

everylog

Real-time notifications for your business

EveryLog provides a simple way to receive notifications for important application events that you choose.

EveryLog: your notifications in one app

<p>FRACTIONAL CTO</p> <p>2 DAYS AGO</p> <p> New task assigned to you</p> <p>Development</p>	<p>DEVINTERFACE</p> <p>2 WEEKS AGO</p> <p> New payment received</p> <p>SaaS/Billing</p>	<p>DEVINTERFACE</p> <p>1 MONTH AGO</p> <p> Configuration updated</p> <p>IoT</p>
<p>DEVINTERFACE</p> <p>2 WEEKS AGO</p> <p> New user subscribed</p> <p>SaaS/Billing</p>	<p>FABRICK SPA</p> <p>3 WEEKS AGO</p> <p> Failure occurred</p> <p>Industrial</p>	<p>DEVINTERFACE</p> <p>1 MONTH AGO</p> <p> Door opened</p> <p>IoT</p>
<p>DEVINTERFACE</p> <p>2 WEEKS AGO</p> <p> Payment failed</p> <p>SaaS/Billing</p>	<p>FABRICK SPA</p> <p>3 WEEKS AGO</p> <p> Process started</p> <p>Industrial</p>	<p>MENUCLICK24</p> <p>2 MONTHS AGO</p> <p> New request from contact form</p> <p>Marketing/Sales</p>

Download the mobile app from the stores

View notifications of all events,
grouped by project.

1

[Register on the website
everylog.io](https://everylog.io)

2

Get the API key. Simple and
fast.

3

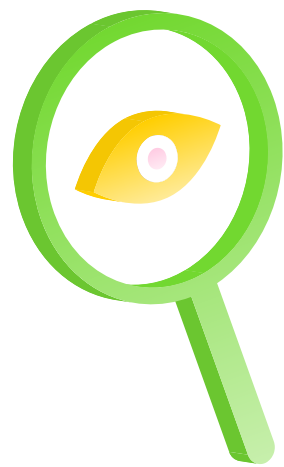

Create new project with a
few clicks.

4

Put the POST request in
your code.

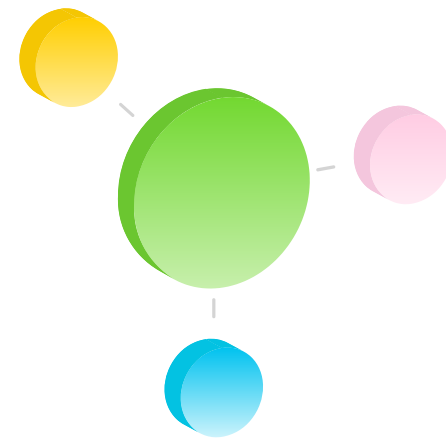

everylog

Quick Access

List, filter, and sort all your notifications.

All-in-One View

Centralize all your important events and access them from anywhere.

Realtime Updates

Receive push notifications for key events.

The features of EveryLog

Users

Multiple users can subscribe to real-time notifications.

Groups

Create Groups of users to control specific notifications.

Channels

Send these consolidated notifications to different channels.

Tags

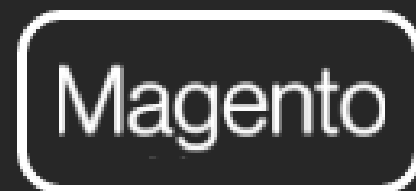

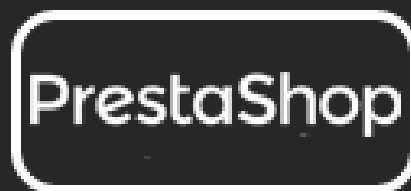

Browse notifications by project and filter events by tags.

**Send your notifications on
other channels such as
Discord, Slack, Telegram,
email and webhooks.**

Don't want to manually send a message to our endpoint?

No problem, we have created clients for the main programming languages and plugins for the most common web applications. [Check out all the integrations](#) to find out which one fits your needs.

A few lines of code and you'll be ready to go!

With just a POST request to our endpoint, you can be notified about events that matter!

Use the language of your choice, for example Javascript, Ruby, Python, Elixir, Go, Rust, Php!

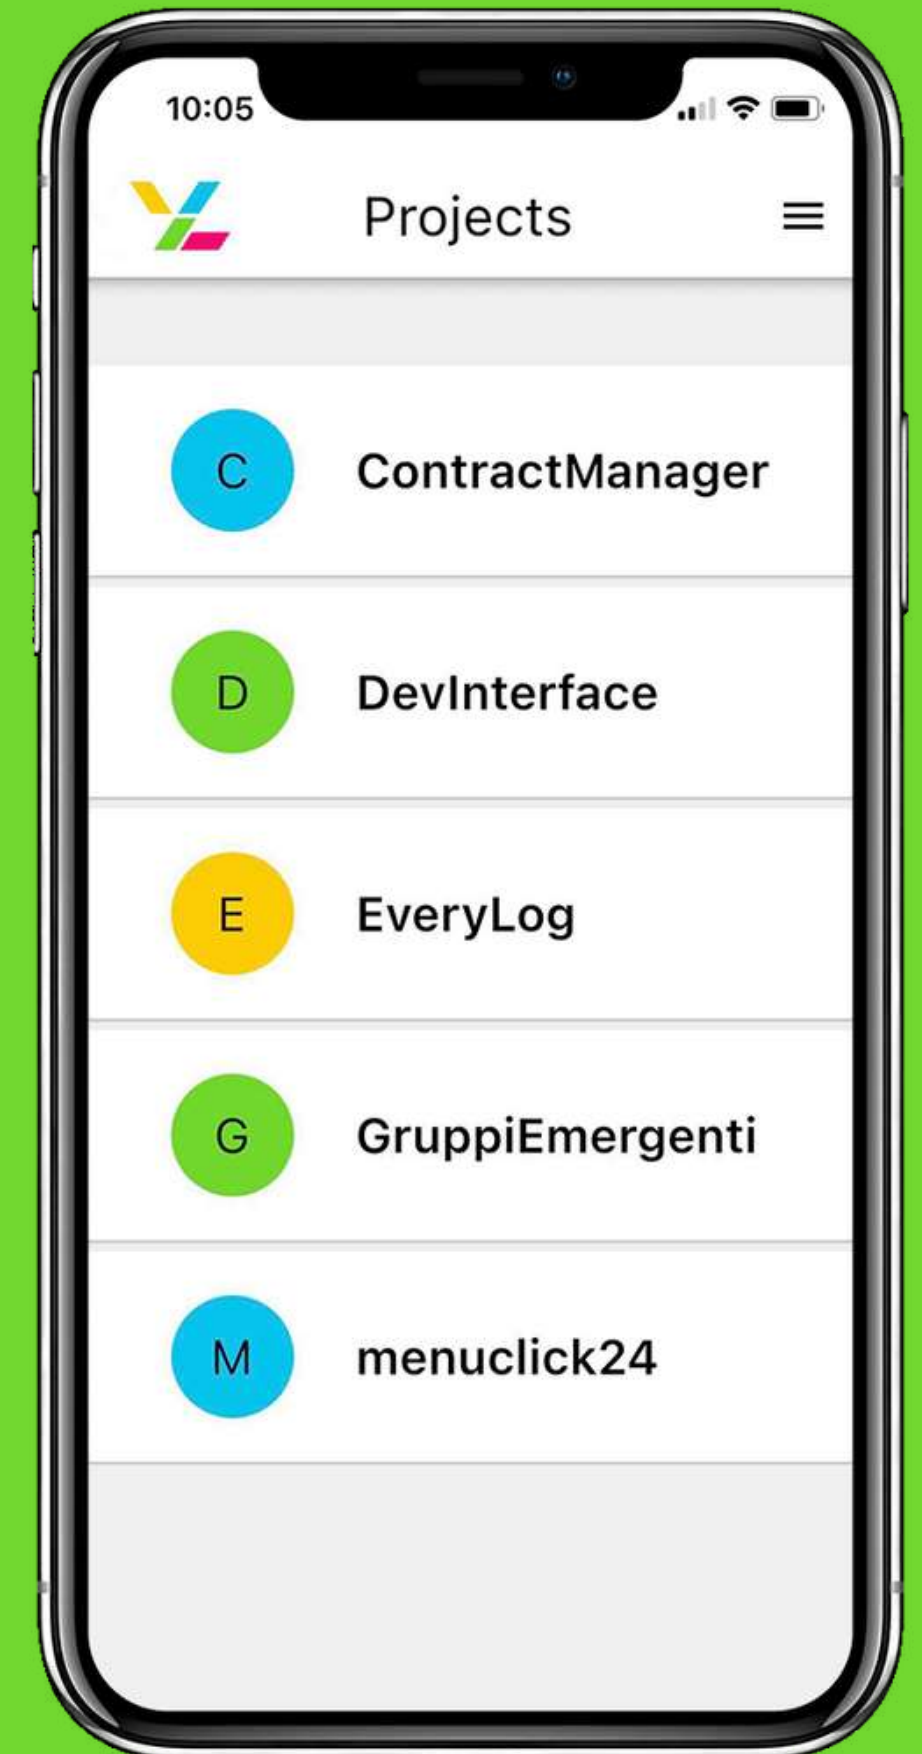

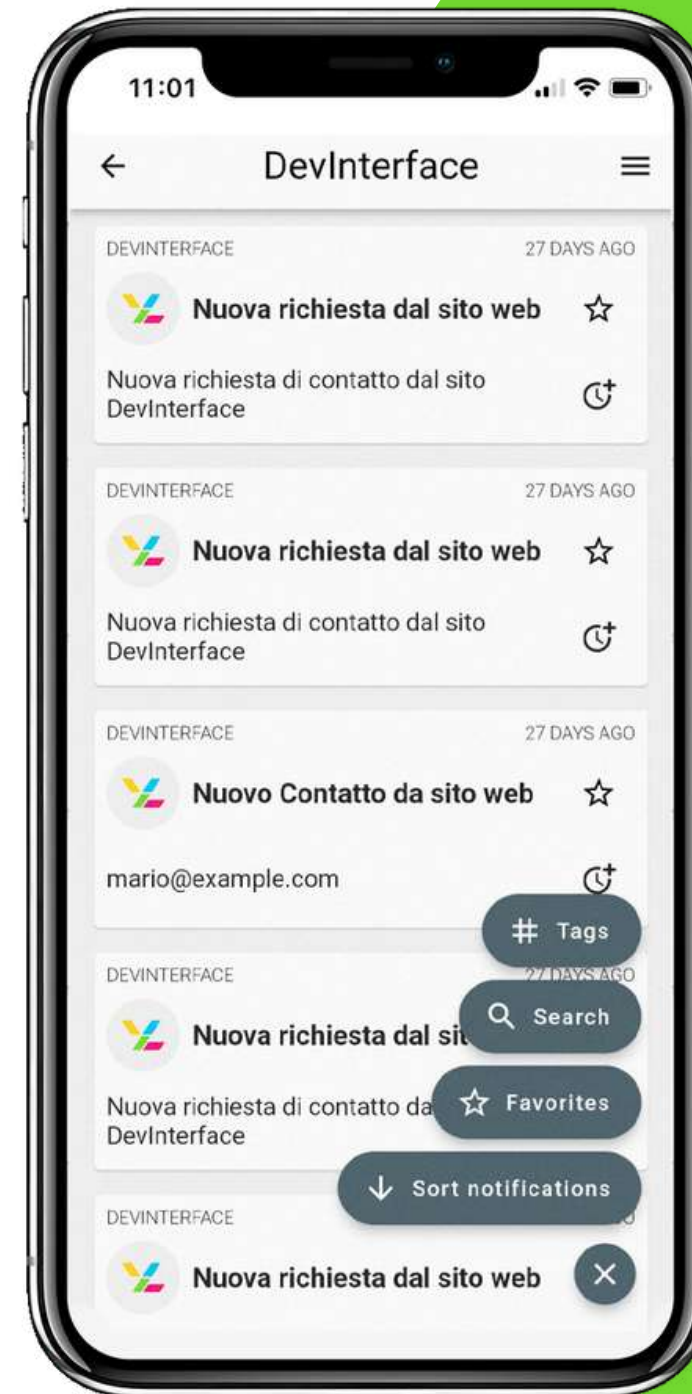

Perfect for all your projects

You can send events divided by project. Create custom notifications by inserting links, emoticons, tags and additional properties.

You can send notifications to a group of users within a project.

Download the mobile app!

Search EveryLog on the Google and Apple stores and start receiving notifications of your projects.

Discover our plans and find the one that best suits your company

STARTER

The essential features to familiarize yourself with EveryLog.
